

ApangeaMath

PROBLEM SOLVED

Award-Winning Online Instruction ★ Grade 3 through High School

**The online solution
that assesses,
instructs, and
motivates
students!**

**Live, certified
U.S. math teachers
provide intervention
and support.**

Apangea Math is highly effective...

Personalized, online instruction accelerates learning and performance.

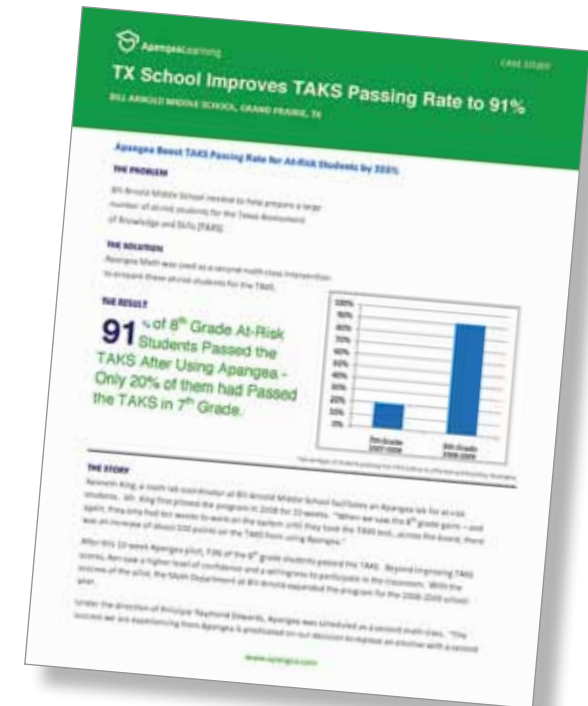

- Intelligent technology and live, certified U.S. math teachers help students build foundational math skills and concepts.
- Effective, research-based instructional strategies engage students.
- A powerful motivation system encourages students to extend their math learning time in school and at home.

...and increases test scores

Read the case studies and success stories.

- Large, urban middle school in Henrico, VA improves 38% on state test.
- Cleveland, OH school makes AYP.
- Boston school test scores beat state average.
- 78% of struggling summer school students in Oconee, GA pass CRCT.

Apangea Math is highly effective...

Personalized, online instruction accelerates learning and performance.

- Intelligent technology and live, certified U.S. math teachers help students build foundational math skills and concepts.
- Effective, research-based instructional strategies engage students.
- A powerful motivation system encourages students to extend their math learning time in school and at home.

Apangea Math provides assessment, instruction, and motivation, and sets students on the path to math success.

...and improves confidence, competence, and math achievement

Assessment Data Adapts Instruction

Students start with a placement test that puts them on a path of personalized instruction. Ongoing formative assessment adapts each student's learning path to meet his or her needs.

Academic and Instructional Rigor

Apangea Math has been proved to be effective by 10 years of research on teaching problem-solving and critical-thinking skills. The program integrates findings from current research and best practices. All content aligns with recommendations of the National Math Panel, state standards, and Common Core.

A placement test and ongoing assessment adapt instruction.

One-on-One Live Teachers

Apangea Math is the only online learning program that has live, certified U.S. math teachers who provide students with just-in-time, one-on-one instruction and support. Our teaching team is on call days, nights, and weekends to help students in and outside the classroom.

Real-World Problem Solving and Critical Thinking

Real-world problems engage students in building relevant problem-solving and critical-thinking skills.

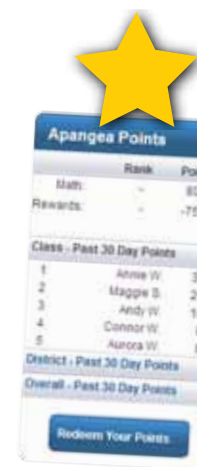

Intelligent technology provides concept review, instruction, and practice at the student's pace.

Motivation

Multiple forms of motivation encourage students to spend more time doing math. Students love the opportunity to work independently in a highly interactive and engaging online learning environment. Each student progresses at his or her own pace, assuring success that builds confidence. Students accumulate Apangea reward points that they can redeem for cool prizes. Contests encourage students across the country to compete for the highest point total.

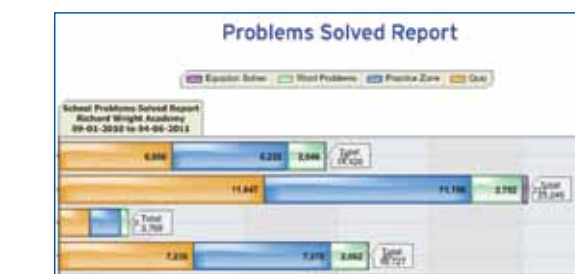

Test Preparation

The Apangea Math Practice Zone simulates high stakes tests, giving students the experience, practice, and confidence that increases test scores quickly.

Learning Beyond the Classroom

Apangea Math is web-based so students can use the program anywhere they have a computer. Students love the program and work days, nights, and weekends to increase their scores. More time on task means better results.

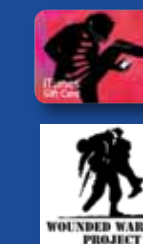

Data Drives Instruction

Apangea Math gathers data on program usage and student performance on standards. Instant access to this data, through up-to-the-minute reports, helps teachers make instructional decisions.

When needed, a live teacher turns the student's monitor into an interactive whiteboard to explain concepts.

Students can redeem Apangea reward points for prizes or donate them to charity.
